

## Adore Me

spill tab

What a torturous thing  
Torturous thing  
To think that you hate me now  
They've been saying that I don't know how  
To be lonely

And I get so defensive  
To think I'd be weak and senseless  
Don't wanna end up all used and loveless

Want you in the evening  
Back when you said that you missed me, how?  
Don't want your pity, just your first time loving  
But only if you adore me now

I'd cave in if you need me  
From feeling you all around  
I get shy when you touch me, high when you call me  
Kill you just to have it out

How could I know the way we'd go down?  
Far away  
Nothing to save us  
I imagined you different

So show some emotion  
Can't you act like you care?  
'Cause you kill like a gun, and shoot at my heart  
And that's not fair

Want you in the evening  
Back when you said that you missed me, how?  
Don't want your pity, just your first time loving  
But only if you adore me now

I'd cave in if you need me  
From feeling you all around  
I get shy when you touch me, high when you call me  
Kill you just to have it out
