

She Stands Alone

Spin Doctors

She don't care about tomorrow
She's had enough of yesterday
Her cup is full of lead and sorrow
Couldn't stand it any other way

She stands alone
She won't fade away
She won't fade
Stands alone
She won't fade to gray

She met her angel late last summer
When she wished upon a star
There is hope for the helpless sinner
I hope you find somewhere you are

You stand alone
She won't fade away
She won't fade
Stands alone
She won't fade to gray

Well, she don't need a soul to borrow
Living in a hell to pay
Rent on rooms all dark and narrow
Places she don't need to stay

She stands alone
She won't fade away
She won't fade
Stands alone
She won't fade to gray
