

# Angels

Spinal Tap

My granddad always told me  
That angels never lie  
They love you and protect you  
From high up in the sky

And if you're feeling lonely  
As if it's near the end  
Call upon an angel  
And they will be your friend

Angels are everywhere  
If you take the time to look  
In every piece of music  
And every single book you read

I don't believe in miracles  
But I can tell you this  
When I've been down and counted out  
And in a deep abyss

When friends have all but left me  
To make it on my own  
I'll call upon an angel  
And they will bring me home

Angels are everywhere  
If you take the time to look  
In every piece of music  
And every single book you read

Angels are everywhere  
If you take the time to look  
In every piece of music  
And every single book you read
