

The Space in Between

Split Chain

Remember December
And conversations eye to eye
You never look back to
The moments we lived, tell me why?
Whatever the weather
I can't believe you still deny
And the further, the better
Just let it go, you've said goodbye
Goodbye

Say anything
Remember December
Fake everything
You turned to another
All is said and done
Your true colours run
Say anything
Remember December

We're falling forever
They say, "Come whatever may"
I still feel the pressure
I didn't sign my life away
I've outrun, I'm outdone
I've fallen down into the kerb
And this grit in my skin
Will wash away, but not the hurt

Away
You
I wish you were true

Say anything
Remember December
Fake everything
You turned to another
All is said and done
Your true colours run
Say anything
Remember December

Talked over
Feign your attention
Your empty whispers
Bleed deception

It's easier to be
Safe in misery

Say anything
Remember December
Fake everything
You turned to another
All is said and done
Your true colours run
I won't let you be my misery
