How Long

Spoken

Rain is falling down
All around me
I feel You on the edge
Thunder speaks Your name

I know You are here
I know You are here

How long will the heavens cry out to You?
How long will creation speak Your name?

Ocean crashing down all around me
Sweeping me from the shore
The waves paint a picture of You

Love is falling down all around me
You're holding me so tight
Holding me to the sky

I know You are here
I know You are here

How long will the heavens cry out to You?
How long will creation speak Your name?

I know You are here
I feel You're in the air
I know You are here
I feel You're in the air

How long will the heavens cry out to You?
How long will creation speak Your name?

Rain is falling down
All around me
I feel You on the edge
Thunder speaks Your name

Ocean crashing down all around me
Sweeping me from the shore
the waves paint a picture of You

Love is falling down all around me
You're holding me so tight
Holding me to the sky

I know You are here
I know You are here
I know You are here
