# Star

**Sponge**

Faith burns in the midnight sky, hope's lost and ready to fly

This heart breaks slow, suicide
Nothing can erase you from my mind
It breaks your soul to pieces
It kills the best and decorates the grave

There's nothing better we could do
(There's nothing better we could do)
There's nothing better we could do
Then name a star after you

Faith burns in the midnight sky, hope's lost and ready to fly

Star bright endless night
Lit with all the virtue left behind
Throw sweet dead flowers to greet us
But, who gives a damn let's dance upon the graves

There's nothing better we could do
(There's nothing better we could do)
There's nothing better we could do
Then name a star after, then name a star after you

Faith burns in the midnight sky, hope's lost and ready to fly
Innocence is all but through

We'll name a star after you

All the world is vanity, her skirts hiked up but she's waiting for me
But I, gave my best but my best is gone

We'll name a star after

I had enough, I had enough, I had enough
Of a world that's broken
I had enough, I had enough, I lost my way
I'm giving up, I'm giving up, I'm giving up
On feeling sorry
I'm getting up, I'm getting up I'm awake

There's nothing better we could do
(There's nothing left to have to lose)
There's nothing better we could do
(That's such a precious thing to lose)
There's nothing better we could do
Then name a star after, we'll name a star after you
We'll name a star after you

All the world is vanity, we'll name a star after you
Her skirts hiked up but she's waiting for me, we'll name a star after you
Faith burns in the midnight sky, we'll name a star after you
Gave my best but my best is through, we'll name a star after you
All the world is vanity, we'll name a star after you
All the world is vanity...
