

Wet Brain

Sponge

Look what you've done and left me
Fix all this shit with my bare hands
I'll lay here and do all the corrective surgery
Real blood flowing from this flesh and bone kinda damn

I'm mopping up for me
I'm mopping up for you
Brains cover the floor like stew
Brains crunching under my shoes

My blood got strange
From your wet brain
Strange
From your wet brain

My blood got strange
From your wet brain
Strange
From your wet brain

Look what you've done and left me
Look what you've done
Look what you've
There ain't enough to drown this fire

You put these rocks around my neck to drown in your ocean
To choke on the memories of everything we lost

I'm mopping up for me
I'm mopping up for you
Brains cover the floor like stew
Brains crunching under my shoes

My blood got strange
From your wet brain
Strange
From your wet brain

My blood got strange
From your wet brain
Strange
From your wet brain

Strange

I'm mopping up for me
I'm mopping up for you
Brains cover the floor like stew
Brains crunching under my shoes

My blood got strange
From your wet brain
Strange
From your wet brain

My blood got strange
From your wet brain

Strange
From your wet brain

Strange

My blood got strange
My blood got strange
My blood got strange
My blood got strange
