

Nobody There At All

Spooky Tooth

The sun is sinkin'
Under the tainted sky
?Like that? boy is crying
Wishin' he could die
And the storm's coming rollin'
Out of the sunset ?patch?
But his tears are not falling
The change has come so fast

And round and round that memory goes but
There's nobody left to call
And anyhow I'm feeling sure
There's no place left to fall
Love is just a kiss away
There's nobody there
Nobody there
There ain't nobody there at all

?? Back when the years were growing
Out where the days were young
His fun was all in knowing
That the song is left unsung
Now the music's all been written
The words mean not a thing
He's left behind him rainbows
???

And round and round that memory goes but
There's nobody left to call
And anyhow I'm feeling sure that
There's no place left to fall
Care is just a tear away
Nobody cries
Nobody cries
Nobody cried at all

You just look in ?heaven?
The past that lingers on
?And the pain comes a-bleedin'?
Falling off a sun
The wind blows round his collar
Whipped up against his face
And life becomes too heavy
???

And round and round that memory goes but
There's nobody left to call
And anyhow I'm feeling sure
There's no place left to fall
Life is just a breath away
There's nobody breathing
Nobody breathing
Nobody breathing at all
