

It's Time To Rock!

.sPout.

don't - don't - don't - don't

don't ask me what time it is I don't know it -a minute or a second- unimportant only here and now -counts- let da clock go around time goes by -time flies- like clouds in sky I cannot stop it, so I don't think about it -big hand little hand- it doesn't matter where they stand

no tick tock tick timeless is my tactic to rock it makes me sick when I hear a ticking clock time is a prison - I can't flee time is a prison - I am not free time is nothing more, than a prison to me

(chorus) no use for a clock - its always time to rock - I don't stop - to rock - da clock up no use for a clock - its always time to rock - I never stop - to rock - da clock up

don't tell me what time it is just let me - in peace no clock - no watch - no filofax I don't need things like this -because- time is stress - stress is shit - I organize my life without it I don't need a timeout - when I am about - to rock da crowd time is always a step ahead trying to catch it is a waste of time - time its like a crime years go by stolen by time time is a limit that I can't break time is a hurdle that I can't take time is nothing more - than a limit to me

(chorus)
