

## Dubstyle

[spunge]

Hey, what the hell is wrong with you  
Come on and join the queue  
If you wanna get off  
Yeah, there's an invisible border  
Come closer where it's warmer  
Before you go stone cold

Maybe we could be the ones to make you happy  
Hell you never know you might even smile  
Maybe we could be the ones to get a little bit of you and put it to some use  
Even if it's only just for while

Hey, come on and join the party  
It's only just started  
So you haven't missed much  
All that you want is peace and quiet  
But we're kicking u a riot  
In your own back yard

Hey, everybody now lets go  
Come on and go with the flow  
Everybody get down  
We're all here to have a good time  
Come in, the water's damn fine  
But leave your morals at home
