

# The Ones

Squeeze

The valves have been opened  
The hot air released  
A fear reignited  
And the temperature increased

It goes on and on and on  
I hope the best is still to come  
So let's take care  
Of the ones we love

There's facts and there are fables  
And they speak for themselves  
The fake news keeps on coming  
Poisoning the well

Lacking a consensus  
On what is true or not  
Cynics and conjecture  
Invite us to join the dots

The pressure's growing  
How can we still be heard  
The young are working harder  
For less than they deserve
