

# Green Light

Squid

Where's the best place to sit if this all goes wrong?  
Maybe the middle  
Maybe the back  
Well, what if I can't get out?

Green light from across the way  
Visibility decreasing, but not for me?  
I always see it, I always knew it  
In a different place  
I think I read this in a book when I was young  
And it still sticks  
It just sticks

Through the cracks of the door  
Where the sunlight hits my skin  
Green light forever more  
Over your shoulder

Through the cracks of the door  
Where the sunlight hits my skin  
Green light forever more  
Over your shoulder

All those symbols I just don't understand  
A running man  
A set of eyes darting up and darting down  
An exit and an entrance, but which one is which?  
Mouths move in slow motion

Through the cracks of the door  
Where the sunlight hits my skin  
Green light forever more  
I think I read that before  
What do you want?  
Well I want you  
What do you want?  
Well I want you

Through the cracks of the door  
Where the sunlight hits my skin  
Green light forever more  
I think I read that before  
What do you want?  
Well I want you  
What do you want?  
Well I want you

Through the cracks of the door  
Where the sunlight hits my skin  
Green light forever more  
I think I read that before  
What do you want?  
Well I want you  
What do you want?  
Well I want you

Mouths move

In slow motion  
It's all they do  
It's all they do  
It's all they do
