

# Falling Asleep

St. Lucia

When you're down I'll take you on a holiday  
When your eyes are looking kinda far away  
And you know I'll be beside you all the way  
If you'd like I'll take you to a matinee

And when you're falling asleep  
Don't let it get in your head  
There's not a moment to think  
There's not a second to waste

In your eyes I see the sun that never sets  
And your mind's open like a flowerbed  
If you know you're getting in your head again  
Open your eyes  
Put the petals to the wind

And when you're falling asleep  
Don't let it get in your head  
There's not a moment to think  
There's not a second to waste

And when you're falling asleep  
You gotta kick it instead  
There's not a moment to think  
There's not a second to waste

I'm trying to write relatable songs  
But my problems keep being so existential  
I'm trying to write relatable songs  
But my problems keep being so elemental

I'm trying to write relatable songs  
But my problems keep being so existential  
I'm trying to write relatable songs  
But my problems keep being so elemental

Babe  
Baby please help me  
I'm falling out of reach  
Right into the memories that fade

Now  
Now you come to me  
The fire and the sea  
Right into the memories that fade

And when you're falling asleep  
Don't let it get in your head  
There's not a moment to think  
There's not a second to waste

And when you're falling asleep  
You gotta kick it instead  
There's not a moment to think  
There's not a second to waste
