

Find It (Transition)

Stacy Barthe

Misery oh, misery oh, stop chasing me down
I can't figure out, figure out, why I'm still around

I gotta find a new way to live, find it
Find a new way to live, find it
When that old thing ain't working, find it
Find a new way to live, find it

Am I insane, insane, for doing the same thing over and over again?
I keep tripping in the same stone I tripped on before, when will I ever learn

I gotta find a new way to live, find it
Find a new way to live, find it
When that old thing ain't working, find it
Find a new way to live, find it
Oh, find it
Oh, find it
When that old thing ain't working, find it
Find a new way to live, find it

What are you doing, your whole life turned upside down
What are you doing, what are you doing, your whole life turned upside down

You better find a new way to live, find it
Find a new way to live, find it
When that old thing ain't working no more
You better find a new way to live, find it
Find a new way to live, find it
Find a new way to live, find it
Find a new way to live, find it
