

## Keep It Like It Is

Stacy Barthe

Let's say we keep it brief  
I got somewhere to be  
You got some nerve calling me  
Let's say we do meet up and talk  
What we're talking bout  
What we're talking for I already know  
All I need to know that was quite a show we both put on  
But it's turn

And even though, even though sometimes  
I miss you like hell  
I think it's best we keep it like it is,  
Keep it like it is, keep it like it is

How could you say you didn't know  
That's why I didn't wanna talk lying out your mouth  
Way been down this road too many times before  
So much I know you what the roads when I'm gonna end up with yo  
u  
You never do nothing  
You're still so predictable

And even though and even though, even though sometimes  
I miss you like hell  
I think it's best we just keep it like it is,  
Keep it like it is

You know what  
It's funny cause I'm in a place right now  
Where, you know I'm okay being without you  
We tried it, you tried it  
It's a little redundant at this point and I think it's best  
That we just act like we never existed to each other  
'Cause that's how you made me feel in a point and like I said  
I gotta be scrupulous who I give my heart next time  
Maybe you know he'll appreciate it, this next guy  
You know, I'm not gonna talk your head off  
We don't even have anything to talk about at this point... seem  
s to be my thing,  
At this point, I just wanna keep it like it is,  
You know  
I don't wanna open any pandora box, I don't wanna regress  
At this point let's just keep it like it is
