

Let It Be

Stacy Barthe

Yes it's true I love you
Could it be I loved you too much
Could it be I loved you away
Tell me was I doing too much
Enough to make you deny me
It only complicates things when you lie
I much rather you tell me
Than pretend to look me in my eyes
You look right past me right past me ohhhhhh
And I see right through you
And I see right through you uuh

'Cause when it's over it's over
Let it be the end
When it's over it's over
Let it be
When it's over it's over, let it be
When it's over it's over, let it be

Maybe I wanted love
And maybe you just wanted a girlfriend
A girl that's just your homie
I'm happy I can be all the above
I just wish you never
Led me on
Wish you would have showed me
Who you really were
Before my feelings got involved
And now my vision just a little blurry
I know I know I know
That I deserve a little better

So, ooh

'Cause when it's over it's over
Let it be the end
When it's over it's over
Let it be
When it's over it's over, let it be
When it's over it's over, let it be

It hurts not for the reason you are thinking
It hurts, more 'cause you stole my heart and pretended
Was anything ever real but I can't see myself without you
Was it ever real, or were you just pretending
Or were just pretending

'Cause when it's over it's over
Let it be the end
When it's over it's over
Let it be
When it's over it's over, let it be
When it's over it's over, let it be.
