

Longshot

Stacy Lattisaw

Here we are again
Standing on the wire
Between what we got
And what we desire

Do we take this chance
Or just back away
And missed so much
By playing it safe

I'm so tired
Of watching others win
No more, "Almost was"
No more, "Could have been"

I'm cashing in
All those someday dreams
I'm gonna risk it all
I'm beckon everything

It's a long shot
But I know we've gotta take it
We've been down from the start
This time we're breaking through

It's a long shot
But the odds are in our favor
There's just no stopping me and you

There's a voice inside
That I can't ignore
Saying just this once
Reach for something more

'Cause by lovers think
We don't have a prey
Coming from behind
We're gonna beat the bet

It's a long shot
But I know we've gotta take it
We've been down from the start
This time we're breaking through

It's a long shot
But the odds are in our favor
There's just no stopping me and you

It's gonna take a lot of faith
But everybody has their name
As long as we always stay together
Gonna win somehow

It's a long shot
But I know we've gotta take it
We've been down from the start

This time we're breaking through
It's a long shot
But the odds are in our favor

There's just no stopping me
(There's just no stopping me)
There's just no stopping me and you
