

## Future

### Stand High Patrol

The future was created in the past  
The life we are living was a draft  
Stuck in a loop that lasts  
We go backward when we think we moving fast

The future was created in the past  
The life we are living was a draft  
Stuck in a loop that lasts  
We go backward when we think we moving fast

Our music is haunted by the past  
The 2000s already passed  
Our future has been smashed  
We are like in a cascade with a raft

The future was created in the past  
The life we are living was a draft  
Stuck in a loop that lasts  
We go backward when we think we moving fast

The future was created in the past  
The life we are living was a draft  
Stuck in a loop that lasts  
We go backward when we think we moving fast

Nostalgia for a future that never came  
That never came  
Nostalgia for a future that never came  
That never came

I can't grasp the present  
The future unknown  
So I relish the past  
A time before my own  
How things might have been  
The now is but a dream  
Spectres sing and dance with me  
Future looking bleak

The future was created in the past  
The life we are living was a draft  
Stuck in a loop that lasts  
We go backward when we think we moving fast

The future was created in the past  
The life we are living was a draft  
Stuck in a loop that lasts  
We go backward when we think we moving fast
