

Memories

Stanfour

I still remember
Laying next to you and counting stars
We said forever
Driving round in circles chasing cars
Thinking it'll never end

We danced to Billie Jean
Way too young to know what it would mean

All these melodies
Bring back memories
Take us back to the start
Tell me where to go
Somewhere only we know
It comes back, back to me
Melodies bring memories

Do you remember
Dreaming big to summer 69
Feeling the pressure
Living just the time of your life
Hoping it would never end

We sang to in your arms
No idea that we would go so far

All these melodies
Bring back memories
Take us back to the start
Tell me where to go
Somewhere only we know
It comes back, back to me
Melodies bring memories

All those throwbacks
Take me right back
Take me right back
All those throwbacks
Take me right back
Take me right back

All these melodies
Bring back memories
Take us back to the start
Tell me where to go
Somewhere only we know
It comes back, back to me
Melodies bring memories
