

# Strange Lights

Stanfour

I was always told  
Son be careful now  
People never are  
What they seem somehow

But I keep rolling down  
The streets at night  
Never biting nails  
In the dim limelight

I keep roaming  
The silent plains and  
I'm captivated  
By flaring signs once again

Strange lights, strange lights  
Shining down on me wherever I go  
Strange lights, strange lights  
Watching out for me whatever I do  
And I keep on waiting  
I've been waiting all my life  
For strange lights, strange lights  
They found me here  
To carry me home

Did you ever fear  
Utter loneliness  
I won't let it get me  
That's my bliss

If I ever am  
On the critical list  
I just have to wait  
For the beams to shift

I keep roaming  
The silent plains and  
I'm captivated  
By flaring signs once again

Strange lights, strange lights  
Shining down on me wherever I go  
Strange lights, strange lights  
Watching out for me whatever I do  
And I keep on waiting  
I've been waiting all my life  
For strange lights, strange lights  
They found me here  
To carry me home
