

When The Lights Go On

Stanfour

Turn the night to day
Fate is calling, we are
Aiming high, dreams ignite
Our souls tonight

We leave behind, all our
Stranded minds cause we
Strive to find a new way

Wave goodbye,
When the lights go on, we
Start to rise
Far beyond the sky

You and I
We travel back in time to
A distant sun
We've known it all along

Turn the wheels make our
Lives a dream sequence
A thousand keys to one door
What's at the core

We can change courses
And we can weigh our choices
Rise and shine, draw the lines
That shape our soul

Wave goodbye,
When the lights go on, we
Start to rise
Far beyond the sky

You and I
We travel back in time to
A distant sun
We've known it all along

Wave goodbye,
When the lights go on, we
Start to rise
Far beyond the sky

You and I
We travel back in time to
A distant sun
We've known it all along
