

# High Moon

Star One

Memories come back to me, it's the 22nd century  
Unthinkable events occur on the 3rd moon of Jupiter

I'd leave this hellhole if I could  
The mining's hard but the pay is good  
There is only one way to survive  
I take the drug to stay alive

The shuttlecraft has landed, the killers have arrived  
I know I'm alone here, there is no one on my side  
I'm ready for the showdown, so let the chase begin  
I will not be defeated  
I have made a solemn vow to leave here soon

High moon

The company is trying to hide the higher rates of suicide  
There's no pain and much to gain,  
But then the drug destroys their brain

I gotta leave this evil place  
I don't belong in outer space  
Outside it's zero atmosphere  
The only way to get out of here

He had to choose between his part in this machine  
Or going back with her to Earth  
He never had a choice, but when he heard her voice  
He fought for all that he was worth

I had to choose, I could not lose  
Had to get back to you  
I had no choice, I heard your voice  
I had to survive, had to stay alive
