

## Down & Out

Starbenders

I saw myself across the hall  
Stay seated  
The only answer I could find  
Keep dreaming

They told me everything was gonna be alright  
The world was burnin', we were fighting to survive  
Stay seated  
My body's buried at the standing stones  
Vultures circle, and they're feeding on my bones  
Just for believing

Down and out living on starlight  
Gotta move and make it by midnight

Now come the ashes raining down  
Stay seated  
And when the dust begins to clear  
Keep drinking

They told me everything was gonna be alright  
The world was burnin', we were fighting to survive  
Stay seated  
My body's buried at the standing stones  
Vultures circle, and they're feeding on my bones  
Just for believing

Down and out living on starlight  
Gotta move and make it by midnight  
(I can feel it, feel it coming)  
Down and out living on starlight  
(Gotta move and make it by midnight)  
Down and out living on the westside  
Can you feel it, feel it coming?

All over the world, we can elevate  
Safe and sound, when you're looking down  
All over the world, we can elevate  
Safe and sound, when you're looking down

Down and out living on starlight  
Gotta move and make it by midnight  
One love, one heart, one love  
One love, one heart, one love
