

# Time Stops

Starbenders

My breath betrays my body  
Mutiny within my chest  
Got chills running through me  
My mind doth protest

Heart, don't fail me now  
You're all I've got left

Time stops without you here  
I'm lost until you're near

Your hands hold me steady  
My strength put to the test  
Daylight finds our bodies  
You lay upon my breast

Heart, don't fail me now  
You're all I've got left

Time stops without you here  
I'm lost until you're near

Time stops without you here  
I'm lost until you're near

I long just to hold you  
Live within your space  
Out of body when I dream  
I see your face

Time stops without you here  
I'm lost until you're near

Time stops without you here  
I'm lost until you're near

Time stops without you here  
I'm lost until you're near
