

# Broken Angels

Starcrawler

I've been trying to fall into your hands  
But no one understands the way I do  
I won't have to stalk you if you just give me a chance  
I don't wanna do this dance again with you

Broken angel  
Burn your wings, I'll make you stay  
Broken angel  
You better pray I'll go away  
It's cold as hell, don't leave me in the dark  
Broken angels fall apart

She's calling, I can see her when I close my eyes  
But heaven doesn't look as bright on your own  
Will you forgive me if I show you what I'm really like?  
Sick of watching you sleep all night, I want in

Broken angel  
Burn your wings, I'll make you stay  
Broken angel  
You better pray I'll go away  
It's cold as hell, don't leave me in the dark  
You gotta finish what you start

Broken angel  
Burn your wings, I'll make you stay  
Broken angel  
You better pray I'll go away  
It's cold as hell, don't leave me in the dark  
Well you know I'm not that smart  
So take it easy on a broken heart

Broken angels fall apart  
Broken angels fall apart  
Broken angels fall apart  
So take it easy on a broken heart

Broken angels fall apart  
Broken angels fall apart  
Broken angels fall apart
