

# Midnight

Starcrawler

Moonlight shine in your eyes  
Waking up as the day dies  
Took the car and we drove outside of town  
Out of gas and there's no way home  
We're falling apart and all alone  
Lift me off the ground

Nobody's calling you  
When love brings you down  
And all those things I wish I knew  
Where are you now?

I  
I feel like a stranger  
Feels like just yesterday  
Why won't you talk to me?  
When you have so much to say

Nobody's calling you  
When love brings you down  
And all those things I wish I knew  
Where are you now?

Come on back to me  
Come on back to me  
And you'll see

Nobody's calling you  
When love brings you down  
And all those things I wish I knew  
Where are you now?
