

Yours

Starley

Even when the darkest clouds are forming
They can never scare my love away
And even when you feel the fight is over
Oh, I, I will fight forever and a day

So if ever, you have ever doubted that I'll be around
If you have ever questioned my love
Then try to think about this moment
When you feel alone, I swear my heart is always with yours
It's always with yours, I'm yours
I'm yours

Even when the world has cut you open
I wanna be the one to hold your hand
And baby I can take the wheel til it's over
Don't really know how, don't have a plan

If ever, you have ever doubted that I'll be around
If you have ever questioned my love
Then try to think about this moment
When you feel alone, I swear my heart is always with yours
It's always with yours, I'm yours
I'm yours

'Cause when the clouds feel like they're falling from the sky
You can find in me a place that's safe to hide
Just want you to know when rivers running from your eyes
I'm right, I'm here by your side
Oh, if ever

If ever, you have ever doubted that I'll be around
If you have ever questioned my love
Then try to think about this moment
When you feel alone, I swear my heart is always with yours
It's always with yours, I'm yours
It's always with yours, mmmmm
It's always with yours, I'm yours
I'm yours
