Stars Go Dim

Can you feel down in your bones  
Power begin to rise  
Counted out, but we ain't no more  
Right now, this is our time

Hear the chorus start to grow  
Deep in your soul  
Sound of the breaking chains  
Like an anthem ringing out  
Everybody now  
Let me hear the people sing

We're all free  
Rising up, we got our feet off the ground  
All free  
Nothing taking, nothing holding us down  
Lift up your hands, breathe it in, breathe it out  
Him and her, you and me  
We're all free

When the sky gets dark and the rain rolls in  
Storm warning loud and strong  
We won't fear no we won't back down  
Our feet keep marching on

Hear the chorus start to grow  
Deep in your soul  
The sound of the breaking chains  
Like an anthem ringing out  
Everybody now  
Let me hear the people sing

We're all free  
Rising up, we got our feet off the ground  
All free  
Nothing taking, nothing holding us down  
Lift up your hands, breathe it in, breathe it out  
Him and her, you and me  
We're all free

Every heart that's beating  
Undefeated  
Let me hear you clap your hands  
Every son daughter  
Sing it stronger  
Let me hear you clap your hands

We're all free  
Rising up, we got our feet off the ground  
All free  
Nothing taking, nothing holding us down  
Lift up your hands, breathe it in, breathe it out  
Him and her, you and me  
We're all free
