

You Never Get What You Deserve

Starsailor

Well they let you down
Fallen angel, upon the ground
And they filled you all up with drugs
Then one day you just gave it up

You're a shining star
Hotels, airports and mini bars
And you lived your life by the book
Then one day you just gave it up

And you, you never get what you deserve, not you
On a life support machine
A damaged teenage queen
A danger to yourself

Did she bring you round
Or win your heart by just being round
O do you think of the one you lost
Late at night while you count the cost

And you, you never get what you deserve, not you
On a life support machine
A damaged teenage queen
A danger to yourself

Life was dealt an awful hand
It didn't end as planned
It started off so well
It started off so well
