

Lightning

State Champs

Did we ever know where we were going?
Every time I turn around, just another ghost
Misreading every feeling
You would think I had the worst intentions
It was all fun and games but you'll never know
In clear view I could hear you

On the phone
But was it you alone?
I was trying to find a reason why
I'd ever let it grow
(Then she said)

Who knew we were lightning?
I saw a spark before we heard any sound to follow

I think it's time to let my eyes stay open
I'm missing out on the point if they're always closed
Switched focus, now I know

This is worth my time
So can you read my mind?
It says I'm trying to find a reason why
To leave it all behind

So I'm out on a limb now
(The past had me pinned down)
I fought through but somehow
I hear you say

Who knew we were lightning?
I saw a spark before we heard any sound
If you look my way instead
We could make this permanent
Is there something waiting to be found?
Who knew we were

Now it's all making sense
In time we would find it
I was caught in suspense
But with you I'm reminded
It's real now

Who knew we were lightning?
I saw a spark before we heard any sound to follow

Who knew we were lightning?
I saw a spark before we heard any sound
If you look my way instead
We could make this permanent
Is there something waiting to be found?
There's still something waiting to be found
Who knew we were
