

## Ice + Grapefruit

Static & Ben El

Ice and grapefruit  
I drink until I hate you  
God I wish I never met you  
I would pay just to forget you

You got that grapefruit  
Every night inside my hotel room  
But now I always try to escape you  
You wanna chill don't know what to tell you  
Not on my schedule

Spoke with the label  
They say I got bigger things on the table  
Can't fall in love even if she an angel  
I cut the cable  
I'm not allowed to fuck being able

You know  
You feel far like Pluto  
But I'm on the moon though  
No more me and you so  
You so

Ice, grapefruit  
I drink until I hate you  
God I wish I never met you  
I would pay just to forget you

All this ice and grapefruit  
I drink until I hate you  
God I wish I never met you  
I would pay just to forget you

I've been lonely  
Miss the way you put it on me  
Used to put it on me only  
Keep it lowkey  
Can't let anyone that knows me  
Know that I be getting all deep

I've seen your ex, not tryna flex  
But he a boy, he don't get no respect  
Bitch I'm a man, shit I'm the best  
The best that you had, I still got the text

You know  
You feel far like Pluto  
But I'm on the moon though  
No more me and you so  
You so

Ice, grapefruit  
I drink until I hate you  
God I wish I never met you  
I would pay just to forget you

All this ice and grapefruit

I drink until I hate you  
God I wish I never met you  
I would pay just to forget you

All this ice, grapefruit  
Until I hate you  
All this ice, grapefruit  
I wish I never met you, no
