

Lye solution

Static Dress

Pray the sky falls
For maybe that'd be easier
As this steel strung casket
Provides more care

Choke, gasp, die, relapse
Plague alive outside
Yet the sun still chases me
As I find comfort tonight

Honesty passed out and isolated
Cold sweats
Adjourn
Burning bodies
Some people never learn

Your control won't stop you bleeding
Opened up wounds left with words unsaid
With the crime in the headlines
And the murder in the city
Your control won't stop you bleeding

Driving through a harsh reality
Crashing cars just to feel something
Stricken fear panicking
She's sitting happy with her prints wiped clean

Only to kill at night
So march in the air
Hands held high

Your control won't stop you bleeding
Opened up wounds left with words unsaid
With the crime in the headlines
And the murder in the city
Your control won't stop you bleeding

Fear dragged under fingernails
Evidence turned blind
Unstable disinfectant to be thrown in my eyes

Fear dragged under fingernails
Evidence turned blind
Unstable disinfectant to be thrown in my eyes

To be thrown in my eyes
