

# Bring You Down (Project Regeneration)

Static-X

It's too late, she's already dead

You were the one to be true  
To be down, I was  
Out of the black, you brought  
Me into the light now

Now take your little pills  
Headlong to overkill  
Resent me cause I  
Represent what you hate, don't wait

Now or never pull you under  
I don't wanna wait to bring you down  
I don't know why you've become what  
I've been hating time to bring you down

Bring me up until you  
Bring me down take me to  
Hell bring me back I can't  
Tell in the black bring it back

Now or never pull you under  
I don't wanna wait to bring you down  
I don't know why you've become what  
I've been hating time to bring you down  
Time to bring you down

I don't wanna wait  
So I'm gonna say this right now  
I feel my mind is going  
My discontent showing  
And now I know, I know  
I've got to bring you down  
I've got to bring you down

Now or never pull you under  
I don't wanna wait to bring you down  
I don't know why you've become what  
I've been hating time to bring you down

Now or never pull you under  
I don't wanna wait to bring you down  
I don't know why you've become what  
I've been hating time to bring you down  
Time to bring you down  
Time to bring you down
