

Stay Alive

Static-X

(You want that night forever)

Mirrored of silver
Slice of white
Strong attachment
Savor the bite
Injection of yellow
With jowl of greed
Blades of fire
I'm living for the night I see

And I can make it magical
This a taste subliminal
Falling down the slippery slope
Take it slow, I feel it go

Just go
I just need you to survive
Cut you up to stay alive
Comes around I'm seeing red
I just need you to survive

Seer of never
Knower of site
Chewing the gristle
Seer of right
Professional addict
You know what I mean
See the desire
I'll make it through the night, you know that

I can make it magical
This a taste subliminal
Falling down the slippery slope
Take it slow, I feel it go

Just go
I just need you to survive
Cut you up to stay alive
Comes around I'm seeing red
I just need you to survive

Need to survive, need to survive, need to survive, need to survive
Need to survive, need to survive, need to survive, need to survive
Need to survive, need to survive, need to survive, need to survive
Need to survive, need to survive, need to survive, need to survive

(You want that night forever)
(You want that night forever)
(You want that)
(You want that)
(You want that)
(You want that night forever)

Just go
I just need you to survive
Cut you up to stay alive

Comes around I'm seeing red
I just need you to survive

Need to survive, need to survive (I just need you to survive)
Need to survive, need to survive (I just need you to survive)
Need to survive, need to survive (I just need you to survive)
Need to survive, need to survive (I just need you to survive)
