

Time To Say Goodbye

Statik Selektah

Uh, E-V, ALC, Statik Selek'
Watch it, uh, let's get it
Talk to 'em for a sec
Before you get into the flow, just talk to 'em for a minute

Yeah, E-V the truth, man
Watch you bring down the movement
Call him the carpenter
Better yet, call him the architect
This shit ain't fly
Rather sit up, watchin' paint dry
E-V killin' this shit, ain't I?
And if they question it, I tell 'em A.I
I'm the answers to your problems, man
Got no dancers, just start it, man
It's the only place I'm headin' for
When in four, goin' for, movin' on we gon' do
How we do, yeah, we rock and roll
As long as Rak' can roll, Babu (Dilated)
We got the block controlled, and that's true
It's sad to say goodbye so I'm through

And I can rock a rhyme in just static
Spontaneous, I drop sporadic
I drop shit when the needle drops down on the plastic
I never drop that ball, I drop that raw
Come sideways out your mouth and I drop that jaw
Fuck the top on the Range, I'll just chop that off
So I can feel the summer breeze blow, when I creep slow
Let out the tree smoke, without a seed, ho
On the line I'm hittin' all of my free throws
Takin' it back, I'm on my repo
I'll switch into beast mode, push it to the max like Stezo
Without those parachute pants and dances
Wild style, I should throw buckets of a paint at a canvas
And let it drip, Statik cut the record, don't let it skip
Test the rocket launcher, light it and let it rip

Goodbye
