

## Too Close to the Ground

Status Quo

When the light hits your eyes  
In the morning  
And the fight to survive  
Is braking you down

You see a chance for an answer  
To fill the empty spaces

But you still don't know what to do  
You're too close to the ground

When the night closes in  
Like an old friend  
And the last of your pills  
Is taking you down

You know the doctor's prescription  
Ain't working like it used to

But you still don't know what to do  
You're too close to the ground, still going down

All your life  
You were waiting  
Just to pass up the dream  
And leave my town

You blew your chance for an answer  
To fill the empty spaces

Oh, you just don't know what to do  
You're too close to the ground  
Too close to the ground, still going down
