

## Breathe

## Stealing Sheep

Feels like love, but acts like fear  
It's right here, but never comes near us  
To protect us from the past  
Words aren't heard, but it's all said  
Every move we make, we say so much  
In our body when we breathe

We'll find each other in the dark  
We'll find each other in the dark  
Places in the heart

Longing looks, and longing stares  
Waiting for the moment to come to  
When you can understand both sides  
Sympathy, come back to me  
And I see it for the first time  
What it means to be like you

We'll find each other in the dark  
We'll find each other in the dark  
Places in the heart

We'll find each other in the dark  
Find each other in the dark  
Places in the heart  
Places in the heart, heart  
We'll find each other in the dark  
Find each other in the dark  
Places in the heart  
Places in the heart, heart

Feels like love, but it never comes near us, us  
Feels like love, but it never comes near us, us, us

Feels like love, but acts like fear  
It's right here, but never comes near us  
Words aren't heard, but it's all said  
Every move we make, we say so much  
In our body when we breathe
