

She got the glow, I got the glow
We got the glow, now everyone knows
She got the glow, I got the glow
We got the glow, now everyone knows
She got the glow, I got the glow
We got the glow, now everyone knows
She got the glow, glow, glow, glow, glow
Now everyone knows
She got the glow, I got the glow
We got the glow, now everyone knows
She got the glow, I got the glow
So much glow, don't burn out, love
Everything, everything, everything's well
She got the glow, she knows herself
Yeah, everything, everything, everything's well
She's the star, she's the brightest
She got the glow, I got the glow
We got the glow, now everyone knows
She got the glow, I got the glow
So much glow, don't burn out, love
Everything, everything, everything's well
Having a good time? Ask yourself
Yeah, everything, everything, everything's well
Sound the siren, scream out

The sun is setting deeper in my heart, so deep
Burns so bright, the feeling's gone
Everything, everything, everything sells
She's the star, she's the brightest
Eyes are glowing pink and orange clouds, for real
How's a second feel so long?
Everything, everything, everything's well
Sound the siren, scream out

She got the glow, I got the glow
We got the glow, now everyone knows
She got the glow, I got the glow
We got the glow, now everyone knows
She got the glow, I got the glow
We got the glow, now everyone knows
She got the glow, glow, glow, glow, glow
Now everyone knows

Slow motion as you realize, don't cry
The tides are changing, tears begin to swell
Everything, everything, everything's well
Sound the siren, scream out
Call the shots this time, I'm dying to see it with you
Never wrong, never wrong, the signs were there so long
Everything, everything, everything's gone
Everything, everything, everything
Everything, everything, everything is burning
She's on fire

And you're thinking
How do I get that feeling?
How do I get that glow?

Red sky, must be dreaming
Everything, everything's happening now
Metia, supernova
Pina Colada
She lifts her hand up to take a picture
Reaching to touch the sky
Adjusting overexposure
The screen won't protect her eyes
Blistering, hot sand
Big bang, bigger bang, boom

So I was lying on my sun lounge
Radiation goggles on and a pina colada
You know, it's all pretty, but everything has got to go
Whoa, atomic doom flashed before my eyes
Do I stop and watch the show until I die?
Well, what's the big surprise?
And do we get purple eyes?
You know you tried so hard to be the star
You stole the show
Now enjoy the glow
Now enjoy the glow

Close your eyes, see the sun
Close your eyes, see the sun
Close your eyes, see the sun
She got the glow, she knows herself
Close your eyes, see the sun
She's the star, she's the brightest
Close your eyes, see the sun
Having a good time? Ask yourself
Close your eyes, see the sun
Sound the sirens, bring the

Close your eyes, see the sun
Feel the warmth on the tip of your tongue
Close your eyes, see the sun
Feel the warmth on the tip of your tongue
Close your eyes, see the sun
Feel the warmth on the tip of your tongue
Close your eyes, see the sun
Feel the warmth on the tip of your tongue
Close your eyes, see the sun
Feel the warmth on the tip of your tongue
Close your eyes, see the sun
Feel the warmth on the tip of your tongue
Close your eyes, see the sun
Feel the warmth on the tip of your tongue

She got the glow, I got the glow
We got the glow, now everyone knows
She got the glow, glow, glow, glow, glow
Now everyone knows
She got the glow, I got the glow
We got the glow, now everyone knows
She got the glow, glow, glow, glow, glow
So much glow, don't burn out, love
Everything, everything, everything's well
She got the glow, she knows herself
Yeah, everything, everything, everything's well
She's the star, she's the brightest
She got the glow, I got the glow
We got the glow, now everyone knows

She got the glow, glow, glow, glow, glow
So much glow, don't burn out, love
Everything, everything, everything's well
Having a good time? Ask yourself
Yeah, everything, everything, everything's well
Sound the sirens, bring the
