

The Knowledge Pt. I

Stealing Sheep

Tiwa received her education through a headphone
Its lessons cut directly into the brain
And were engraved in the memory forever
Our planet, Ygam, has just one satellite
The Savage Planet
It is uninhabited and is used for meditation
Ygam is divided into several Uvas
Two Uvas, Strom and Yot, are natural and symmetrical
Urtana is the longest Uva
And is completely covered with blue assanic blocks
Its temperatures range from eight to two-four-three laiks
Making it impossible to exploit
Our Uva, Goham, has a fepular inland sea
Stabilizing the openosh to about twenty laiks
Fixation blocks offset pontic rebation
Er-shaped globes regulate pressure
All Uvas undergo a cycle of three seasons of equal length
The season of garus crystallisation
Due to some fault
I was also able to acquire the Draags' knowledge
When the earth peels, an intense vegetation replaces all nosks
With similar nosks
I liked the lessons
I tried to get the most out of them
The cliffs on the fepular sea are eroded by rains
That often last for a long time
