

True Colours

Stealing Sheep

Colours, colours, colours
Colours, colours, true colours
Colours, colours, colours
True, true colours

True, true, true, true colours
True, true, true, true colours

We are so far from the start
We played it on from our heart
Where do you belong? I don't know
You're the only one who can show
Show me your true colours

True, true, true, true colours
True, true, true, true colours
True, true, true, true colours
True, true, true, true colours

Where do we go from here?
Gone are the days when it was
So crystal clear (true colours)
True colours, true colours
True colours, true colours
Those days are gone, so we better just
Change how we feel, feel

True, true, true, true colours
True, true, true, true colours

Colours, colours, colours, true colours
Colours, colours, true, true colours

We played it on from our heart
Where do you belong? I don't know
We played it on from our heart
We played it on from the start
Like no other, you are who you are
Those days are gone now
You better just run, just run
True colours, true colours
True colours, your true colours
True colours, true colours
True colours, your true colours
