

Transform

Steam Powered Giraffe

Can you make it go away
Can you make me right
Can you make the thoughts all stop
So I can hide them out of sight

Am I naive for wanting
Something better
If we can't build peace can we at least
Rebuild me

If you loved me
I wouldn't have to wonder
I wouldn't have to blunder
Through this life

If you loved me
I wouldn't have to run away
I wouldn't have to hide away
Through this life

If I could transform
And change the way I am right now
I'd be, be
Exactly what you want to see

If you loved me
I wouldn't have to be sad
I could smile and you'd be glad
That I'm from this life

If I could transform
I wouldn't have to be afraid
I wouldn't have to be unmade
From this life

I don't want special treatment
I don't want attention
I just want to coexist
On the realm that you play on

Open up your heart
Take me as I am
Love me, hate me, break my heart
Just let me live

Well if you loved me
I wouldn't have to be sad
I could smile and you'd be glad
That I'm from this life

(If I could) Transform
And I don't have to be afraid

I wouldn't have to be unmade
From this life, life

Well if you loved me

(Just go ahead and transform)
I wouldn't have to be sad
(Just go ahead and transform)
I could smile and you'd be glad
That I'm from this life

If I could transform
I wouldn't have to be afraid
I wouldn't have to be unmade
From this life

Life
Transform
Yrsh wlcu tu the kuhkay vol
Iginnsinga Pompeii

Give yourself a combo plate
Transform
Transform transform everybody transform

If we could transform
We wouldn't have to be afraid
We wouldn't have to be unmade
From this life

(If we could transform)
You didn't have to offer your hand
(We wouldn't have to be afraid)
'Cause since I've kissed you I am at your command
(We wouldn't have to be unmade)
But you did, yes you did
(From this life)

If we could transform
And change the way we are right now
It'd be, be
Much, much, too easy

Can you take those thoughts away
Can't you see I'm fine
Warm your heart, don't you see
It's just the same as mine

Am I naive
