

Where I Left You

Steam Powered Giraffe

Where I left you

On the journey home, I passed by the moon
If I'd a built-in camera phone, I'd send a photo to you
If you'd tell me, where I left you

Where he left you

I'm just a robot in bloom, charting a brand new tune
I can't help but think of you, lost in eternal gloom
If you'd tell me, where I left you

Where I left you, without a clue
Gotta keep on searching, gotta keep that chin up

Where he left you
I'm running out of fuel, searching on them fumes
Or did I just imagine you, to fend off the blues
I've searched everywhere, even under the moon

I'm not giving up on you, but if what they say is true
I'm gonna give you some time and space to find me to

Where I left you, where you left me to
I know that someday soon, we will meet again

Where I left you
