

# Knocking Down the Wall

Stefanie Heinzmann

I was a pro at biting my tongue  
And not too strong about what I want, nuh-uh  
It didn't get me far (It didn't get me far)  
I built a wall too keep me all safe  
But then a wall turned into a cage, nuh-uh  
It didn't get me far (It didn't get me far)

And I'm done and I'm done and I'm done  
I'm done feeling sorry  
Ain't no one, ain't no one who can do it for me

I'm knockin' down the wall, knockin' down the wall  
I'm stronger than before, stronger than before  
Won't let it hold me back  
Won't get stuck in my head  
I'm knockin' down the wall, knockin' down the wall

Now if I look back at my life  
And all the stuff that I have survived,, uh-uh  
I guess I got so far (I guess I got so far)  
So what is wrong in sayin' "I'm proud"?  
And if I feel it then I say it out loud, uh-uh  
I guess I got so far (I guess I got so far)

And I'm done and I'm done and I'm done  
I'm done feeling sorry  
Ain't no one, ain't no one who can do it for me

I'm knockin' down the wall, knockin' down the wall  
I'm stronger than before, stronger than before  
Won't let it hold me back  
Won't get stuck in my head  
I'm knockin' down the wall, knockin' down the wall

Knockin' down the wall, knockin' down the wall  
Knockin' down the wall, knockin' down the wall

And I'm done and I'm done and I'm done  
I'm done feeling sorry  
Ain't no one, ain't no one who can do it for me

I'm knockin' down the wall, knockin' down the wall  
(Knockin' down the wall, yeah)  
I'm stronger than before, stronger than before  
(Knockin' down the wall, yeah)  
Won't let it hold me back  
Won't get stuck in my head  
(Knockin' down the wall, yeah)  
I'm knockin' down the wall, knockin' down the wall  
(Knockin' down the wall, yeah)

Knockin' down the wall, knockin' down the wall  
(Knockin' down the wall, yeah)  
Knockin' down the wall, knockin' down the wall  
(Knockin' down the wall, yeah)  
(Knockin' down the wall, yeah)  
Knockin' down the wall, knockin' down the wall

(Knockin' down the wall, yeah)
