

Little Universe

Stefanie Heinzmann

Sometimes I feel like a stranger
Walking through the world
It's almost like I fell out of the sky
Just like everyone who needs a place to be
Who they wanna be
Somewhere to laugh
Somewhere to love
Somewhere to cry
Somewhere of you needed
Somewhere of wanted
Somewhere, I know someones waiting for me
Somewhere I can break down
Lose myself and be found
Where time's stops and we can just be

I've been all around the world
And there's no place like this
Where everybody seen my scars
And noone is me shit
I know a place where I feel safe even when it hurts
It's only you and me
In our little universe, little universe, little universe

Farther apart we are the closer we become

It's an honest truth are running through our veins
For every star that's born there is no doubt
Another star burns out
You know I'm here
I know you there
We know a place

I've been all around the world
And there's no place like this
Where everybody seen my scars
And noone is me shit
I know a place where I feel safe even when it hurts
It's only you and me
In our little universe, little universe, little universe

I've been all around the world
And there's no place like this
Where everybody seen my scars
And noone is me shit
I know a place where I feel safe even when it hurts
Our little universe, Our little universe, little universe, little uni
verse
