

Black As Night

Stela Cole

You look so pale standing next to her
Cheekbones are caving in this winter snow
I hope she keeps you warm
You don't look satisfied anymore, but I hope you're happy
I hope you're given everything you want and so much more
But you look so pale, you look so pale in her arms
You breathe in slow, you breathe in slow
I just wanna know, how you've been since you left?
You said you loved me, then your feelings were dead
You look so pale in her arms

The day that you died was the day that you left me
Heart was cold and your body was icy
So please remind me when you're six feet under
To bring you roses of your favorite color
Black as night, black as night, black as night
Black as night, black as the night
The night you left me

What does she have that I am missing?
Is there something I can change?
What is it you find so interesting?
Is it something I didn't have?
I gave you all my time, gave you all my love
Gave you everything, I guess it wasn't enough
But you look so pale in her arms

The day that you died was the day that you left me
Heart was cold and your body was icy
So please remind me when you're six feet under
To bring you roses of your favorite color
Black as night, black as night, black as night
Black as night, black as night, the night you left me

Uuh, uuh, uuh, uuh

The day that you died was the day that you left me
Heart was cold and your body was icy
So please remind me when you're six feet under
To bring you roses of your favorite color
Black as night, black as night, the night you left me
Black as night, black as night, the night you left me
