

Face It

Stella Donnelly

I don't think I will ever forget
But it will get easier
To leave and come back home
Act like i'd never gone

I don't think I will ever forget
But it will get easier
To watch you from a further city in the world
My eyes are painted on
My eyes are painted on

If i put all the evidence and all the arguments aside
Leave the fear behind
I'll chase you through the calendar

I have questioned everything that I never would before
You crashed down all the walls and watch me scramble out of bed
My smile is pasted on
My smile is pasted on

I'm locked out of my body and all its usual common sense
I'll be here in the end
Playing with myself again
