

## Automatic

Stellar Kart

Sure as a phoenix sunrise  
And the yanks in the playoffs every year  
You're absolutely faithful  
I'm positively prone to disappear

But like I breathe  
And my heart beats

I wanna love you like it's automatic  
Make you into my good habit  
You're the only one that really matters  
Every minute everyday it's automatically ok  
When I make it all about you

It's a mixed up messed up world with  
An unsatisfaction guarantee

So I'm pledging my allegiance  
To the one and only one  
Who can set me free

Just like I breathe  
And my heart beats

But I'm not a robot  
Made with no thought  
What's the point of living life without the will to choose  
To run with the have nots  
Or go with the sure shot  
I'm with you
