

Superstar

Stellar Kart

Before I leave, I have something to say
I can't go on one more day
The feeling of this world I can't get close to
Remembering me won't be so hard to do

Where are you superstar?
Where everything is wherever you are
And where there's no limit to how far
Where are you superstar?

All this searching has led me nowhere
And it feels like you don't care
And how are you content within the walls of safety?
Taking free away from me

Where are you superstar?
Where everything is wherever you are
And where there's no limit to how far
Where are you superstar?

Where are you superstar?
Where everything is wherever you are
And where there's no limit to how far
Where are you superstar?

It's now or never, I'll be gone forever
Unless you help me now
It's now or never, I'll be gone forever
Unless you help me now

Where are you superstar?
Where everything is wherever you are
And where there's no limit to how far
Where are you superstar?

Where are you superstar?
Where everything is wherever you are
And where there's no limit to how far
Where are you superstar?
