

A Fool At Heart

Stephen Bishop

There's a million heartbeats out here in the dark
And every little step you take leads you into the center
Till you catch your spark
Then you watch it grow
Until it turns into a spotlight
And the world could fall apart all around you
But two can make it
If it's love, walk right on through
But please
Don't make a fool of me
I spent my whole life believing
Right from the start
I was a fool at heart

There's a young boy sitting in a bar next door
And he's singing of love so sweet
But he's much too young to know what it means
It makes me smile
I wonder how he'll feel when sings that song for real
I know better than to fall for you
You see, every has a dream of his own
And I've thrown all but one away
You want to stay, then please
Don't make a fool of me
I spent my whole life believing
Right from the start
I was a fool at heart

Please, don't make a fool of me
I spent my whole life believing
Right from the start
I was a fool
At heart
Yeah

We've got time, I know it
Now that you're mine, show it
You and me, together
Will just get to be better and better
Don't let me down
If you see me low, just pick me off the ground
Just let me go
You and me, together
Will just get to be better and better

Don't let me down
If you see me low, just pick me off the ground
Just let me go
You and me, together
Will just get to be better and better

Don't let me down
If you see me low, just pick me off the ground
Just let me go
You and me, together
Will just get to be better and better...
