

All This Space

Stephen Day

I wanna hang out
And crash at your place
Order take out
And get rid of

All this space (all this space)
All this space (all this space)
No need to freak out
Don't have to change your name
I can sneak out
And get rid of

All this space (all this space)
All this space (all this space)
Is killing me

I know you're stressed out
But baby ride the wave
Let the rest out
Let's get rid of

All this space (all this space)
All this space (all this space)
Is killing me
Let's get rid of

All this space (all this space)
All this space (all this space)
Is killing me

I can handle canceled parties
Or a drinking too much headache
I can hold my breath underwater
But I don't know if I can take

All this space (All this space)
All this space (All this space)
All this space (All this space)
All this space (All this space)
Is killing me

All this space (All this space)
All this space (All this space)
Is killing me (All this space)

All this space
